

JNM PLASTIC COLLECTION

www.jnmconsulting.org

300KG COLLECTED!

WHAT WE COLLECT

All 3D Filament Types &

- PLA
- PETG
- ABS
- TPE/TPU

#1 PET/PETE Plastic

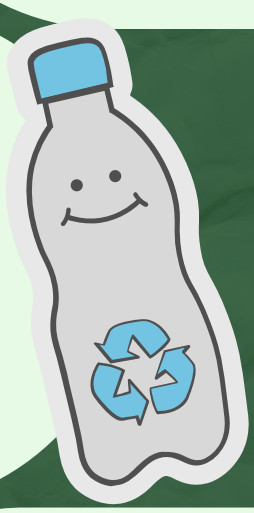

HOW WE COLLECT

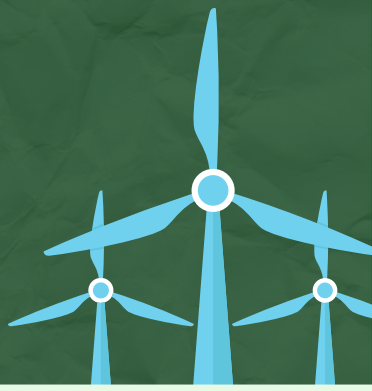

Drop us an email or call for bulk pickup service of material over 50lbs

Malcolm M.

414-395-0181

admin@jnmconsulting.org

WHERE WE COLLECT

Feel Free to Ship Us Your Material!

9632 W. Appleton Ave
Milwaukee, WI 53225

WHAT IS #1 PET/PETE PLASTIC?

PET OR PETE (POLYETHYLENE TEREPHTHALATE)

Soda and water bottles; mouthwash bottles; peanut butter containers; salad dressing bottles; honey and nut containers; mini liquor bottles; hand soap.

WHY WE COLLECT

PET/PETE is currently among the less commonly used filaments in the 3d printing community as it requires a local recycling processor or in house production of the filament.

WHAT WE PLAN TO DO

We plan to shred the collected plastic bottles and containers and then extrude them into filament that can be 3D printed into tools, art, and building materials.

JNM FILAMENT

These are the Types of Filament We Collect

Polyethylene Terephthalate Glycol (PETG) is a synthetic thermoplastic polyester filament

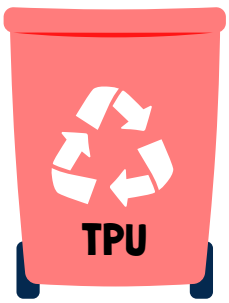

PLA (Polylactic Acid) filament is a thermoplastic polymer derived from renewable resources such as corn starch or sugarcane.

Acrylonitrile Butadiene Styrene (ABS) is a strong and durable thermoplastic polymer known for its impact resistance and high heat tolerance.

Thermoplastic Polyurethane (TPU) is a flexible and elastic thermoplastic polymer known for its durability and abrasion resistance.
